

New Item

Enter an item name

jendevops

Select an item type

- 

Freestyle project

Classic, general-purpose job type that checks out from up to one SCM, executes build steps serially, followed by post-build steps like archiving artifacts and sending email notifications.
- 

Pipeline

Orchestrates long-running activities that can span multiple build agents. Suitable for building pipelines (formerly known as workflows) and/or organizing complex activities that do not easily fit in free-style job type.
- 

Multi-configuration project

Suitable for projects that need a large number of different configurations, such as testing on multiple environments, platform-specific builds, etc.
- 

Folder

Creates a container that stores nested items in it. Useful for grouping things together. Unlike view, which is just a filter, a folder creates a separate namespace, so you can have multiple things of the same name as long as they are in different folders.

The image is a screenshot of a web browser displaying the Jenkins Configuration page. The browser's address bar shows the URL "13.126.4.58:8080/job/jendevops/configure". The page title is "Jenkins - jendevops / Configuration". The left sidebar contains a "Configure" section with links to "General", "Source Code Management", "Triggers", "Environment", "Build Steps", and "Post-build Actions". The main content area is titled "Jenkins Credentials Provider: Jenkins" and "Add Credentials". It contains a form with the following fields: "Domain" (set to "Global credentials (unrestricted)"), "Kind" (set to "Username with password"), "Scope" (set to "Global (Jenkins, nodes, items, all child items, etc)"), "Username" (set to "Sreya89"), and "Password" (empty). Below the "Username" field, there is a message "Blank username; did you mean to use secret text credentials instead?" and a checkbox "Treat username as secret" which is unchecked. At the bottom of the form, there are "Save" and "Apply" buttons. The browser's taskbar at the bottom shows the system clock as 21:28 on 17-10-2023, and the temperature as 31°C.

Started by user [Sreya S](#)

Running as SYSTEM

Building in workspace /var/lib/jenkins/workspace/jendevops

The recommended git tool is: NONE

using credential 3d1619eb-a197-4835-aa3d-d9d50688935b

Cloning the remote Git repository

Cloning repository <https://github.com/Sreya5889/jendevops.git>

```
> git init /var/lib/jenkins/workspace/jendevops # timeout=10
```

Fetching upstream changes from <https://github.com/Sreya5889/jendevops.git>

```
> git --version # timeout=10
```

```
> git --version # 'git version 2.43.0'
```

using GIT_ASKPASS to set credentials

```
> git fetch --tags --force --progress -- https://github.com/Sreya5889/jendevops.git +refs/heads/*:refs/remotes/origin/* # timeout=10
```

```
> git config remote.origin.url https://github.com/Sreya5889/jendevops.git # timeout=10
```

```
> git config --add remote.origin.fetch +refs/heads/*:refs/remotes/origin/* # timeout=10
```

Avoid second fetch

```
> git rev-parse refs/remotes/origin/main^{commit} # timeout=10
```

```
> git rev-parse origin/main^{commit} # timeout=10
```

ERROR: Couldn't find any revision to build. Verify the repository and branch configuration for this job.

Finished: FAILURE
